

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law

It has stopped alot of unwanted calls, interupting family times at homes...dinner, time with my children etc...

I used to recieve several calls a day, sometimes up to 12 calls. I recieve anywhere from 0 to 3 calls a day.

I just feel that my home time should not be bothered with unwanted calls, Phone service is expensive as it is. I have been plagued with many harrassing calls and there is very little that can be done to stop these calls. It would be a great tragedy if this Law is now kept the way it is right now.
